PROFESSIONAL SUMMARY

Java Backend Developer with 3 years of experience developing enterprise applications using Java, Spring Boot, REST APIs, SQL, and microservices. Experienced in building secure backend services, database integration, enterprise system integrations, and production issue resolution. Leverages GitHub Coding Agent and GitHub Copilot for AI-assisted API development, with hands-on experience reviewing, testing, and refining generated implementations for reliable production delivery.

TECHNICAL SKILLS

Programming: Java, SQL, Python
Backend: Spring Boot, Hibernate/JPA, REST APIs, Microservices, JDBC
Databases: SQL Server, MySQL, Oracle, Query Optimization, Indexing
Integration & Security: IBM MQ, SOAP/HTTP, XML, SFTP, JWT, CSRF
DevOps & Tools: Git, Maven, Docker, Kubernetes, CI/CD, Postman, Swagger, GitHub Copilot, GitHub Coding Agent

EXPERIENCE

Java Developer **Nov 2023 – Nov 2026**
Tata Consultancy Services (TCS)

- Leverage GitHub Coding Agent and GitHub Copilot to generate end-to-end Spring Boot endpoints from structured prompts, reducing development effort by **40%**; review, test, and refine generated controllers, services, DTOs, validation, and persistence components before integration.
- Engineer Spring Boot backend services and RESTful APIs using layered architecture, implementing business logic, validation, exception handling, and data-access components for enterprise workflows.
- Optimize data-access performance through SQL queries, JPA repositories, JDBC operations, database views, and stored procedures, reducing query execution time by **30%**.
- Integrate enterprise applications through REST/SOAP interfaces, IBM MQ messaging, XML processing, and scheduled SFTP-based data exchanges for reliable system-to-system communication.
- Resolve application and integration defects through log analysis, debugging, and root-cause investigation, contributing to a **30%** reduction in recurring production issues.
- Collaborate with business analysts, QA, and DevOps teams throughout Agile/Scrum delivery cycles, contributing to requirement analysis, development, testing, code reviews, deployments, and production releases.

PROJECTS

Third Party Appointment Platform (TPAP) | *Java, Spring Boot, REST APIs, SQL Server, JWT, IBM MQ*

- Developed backend functionality for People, Firms, Contracts, Firm-People relationships, User Profile, and Landing Search modules supporting enterprise appointment workflows.
- Secured REST APIs through JWT signature and expiry validation, extracting authenticated user claims to establish user context before executing business operations.
- Orchestrated SQL Server, SOAP/HTTP, IBM MQ, and SFTP integrations while implementing stored-procedure-driven aggregation for unified searches across people, firms, contracts, and relationships.

Client Assignment System (CAS) | *Java, Spring Boot, REST APIs, JWT, SQL*

- Built Spring Boot backend functionality for branch, policy, client assignment, administration, and national-level enterprise workflows.
- Implemented interceptor-based JWT authentication with signature and expiry validation, authenticated user-context extraction, session management, and CSRF token handling.
- Developed service-layer business logic and repository-driven data access for branch, policy, assignment, and administrative operations, exposing structured DTO-based responses to the UI.

Associate Data Reports (ADR) – CMOD Integration | *Java, Spring Boot, REST APIs, CMOD, PDF/Excel*

- Developed REST APIs for enterprise report search and document retrieval, integrating Spring Boot services with CMOD to deliver downloadable PDF and Excel reports.
- Implemented role-based scope resolution for Associate, Branch, and District users, including report-specific date normalization, search criteria construction, and downstream CMOD orchestration.
- Built document-processing workflows for report filtering, PDF/Excel conversion, binary response handling, and standardized error handling for authentication, invalid requests, empty results, and downstream failures.

EDUCATION

Vignan's Lara Institute of Technology and Sciences **Vadlamudi, India**
B.Tech in Electronics and Communication Engineering *Aug. 2019 – May 2023*
